Photographic modelling for LiU

Do you like having your photo taken? Or do you find the idea of a professional photo shoot exciting? Do you want to contribute to presenting Linköping University as a potential workplace?

We want to present a true image of working at Linköping University in recruitment advertisements that are published in local newspapers, industry-specific magazines and on the internet. We want to show people who are working at LiU today, in their true surroundings.

Photography will take place on 6 and 7 October at the University Hospital Campus, between 8.00 and 12.00.

Who are we looking for?
We need many different people of all ages from the entire organisation. What’s important is that you feel comfortable in front of a camera.

Since we want to reflect the broad diversity that is present at the university, we particularly encourage applications from people who consider that their expression transcends accepted norms.
