We will:

- Produce and disseminate research findings with international impact
- Attract promising students at all levels and produce sought-after graduates for a sustainable society in a changing world
- Strengthening and developing internationally vigorous research environments that also take responsibility for education and collaboration
- Advancing our profile as a campus- and programme-based university with innovative, challenging and student-inclusive programmes
- Contribute to knowledge-based social development
- Attracting promising students at all levels and producing sought-after graduates for a sustainable society in a changing world
- Advancing and strengthening collaboration with the surrounding society
