

Short Bio:

Andreas Kerren received his PhD degree in Computer Science from Saarland University, Saarbrücken (Germany). In 2008, he achieved his habilitation (docent competence) from Växjö University. Dr. Kerren is currently a Full Professor in Computer Science at the Department of Computer Science and Media Technology, Linnaeus University, where he is heading the research group for Information and Software Visualization, called ISOVIS. His main research interests include the areas of Information Visualization, Visual Analytics, and Human-Computer Interaction. He is, among others, editorial board member of the Information Visualization and Computer Graphics Forum journals, has served as organizer/program chair at various conferences, such as IEEE VISSOFT 2013/2018, GD 2018, or IVAPP 2013-15/2018-20, and has edited a number of successful books on human-centered visualization.
