LiU is announcing the VFN-program to provide funding for dissemination and utilization of research results - an opportunity to valorize your knowledge assets.

"VFN takes your knowledge further"

SHOW YOUR RESULTS

Universities have a responsibility to utilize the research results that are created, but the resources required to make them available to those outside the academic world can be difficult to obtain. To address this, LiU is opening a new call for the Verifiering för Nyttiggörande, VFN program 2019. VFN provides financing of up to SEK 50,000 for individual projects where the goal is valorization of knowledge assets.

PURPOSE

The VFN-program aims to:

- encourage the dissemination of research results to a wider audience outside academia
- find new ways of utilization - practical use of generated knowledge
- create learning about best practices for valorization

WHAT CAN BE FINANCED WITHIN VFN?

VFN can finance your own time and activities in order to disseminate, utilize and valorize research results for non-academic stakeholders. Examples of activities are:

- production and dissemination of popular science presentations
- active participation in specific trade fairs / conferences
- organization of seminars / workshops
- adaptation of knowledge assets for specific applications

Activities not considered for funding:

- previously-established forms of collaboration
- commissioned research and commissioned education
- marketing of education
APPLICATION
The application should be no more than one A4 page with the following headings:

Information about applicants
- Name and department affiliation
- Contact information

Research results and stake holders
Brief description of the research results to be utilized, the purpose and who the recipients of these results will be.

Activity
Requested funding (max. SEK 50,000) and how it will be used.

CONTACT FOR MORE INFO AND APPLICATION PROCEDURE
The application is sent in pdf format by e-mail to:
