

LAURA DAMSCHRODER LECTURE

Applying the Consolidated Framework for Implementation Research (CFIR): Building Implementation Science Theory and Practical Recommendations

In this lecture **Laura Damschroder** will describe the development of the CFIR, a widely used framework for identifying barriers and facilitators for implementing evidence-based practices and programs into practice.

She will discuss its use in implementation research, how to develop implementation strategies and plans for future development of the framework. There will be time to discuss, so please bring your own questions!

Laura Damschroder is the lead developer of CFIR, one of the most widely cited frameworks in implementation science and has led many trials and evaluation projects. She provides expert consultation on many publicly funded research projects focusing on translating evidence-based practices into routine clinical care. She is principle investigator with Veteran Affairs' Quality Enhancement Research Initiative (QUERI) Program, Ann Arbor, USA.

Date and time: 27 November 2019, 14:00-16.00
Location: Linköping University Campus US (Building 511-001), Tidlösa, 14th floor. Access by entrance 78.
