A workshop in memory of Dr. Patrik Olausson
Biomarkers and mechanisms in chronic pain

Date: 7th February 2020 Location: Hasselquist, campus US, entrance 78

9.00-9.15 Welcome and Introduction
9.15-9.45 Dr. Bijar Ghafouri
“Painomics a tool to bridging the gaps in biomarker research in fibromyalgia”

9.45-10.45 Professor Juan M. Falcón-Pérez, Head of Exosomes Lab. and Metabolomics Platform, CIC bioGUNE, IKERBASQUE, Spain
“Searching candidate molecular biomarkers for fibromyalgia by applying omics approaches”

10.45-11.30 Professor Björn Gerdle
“Peripheral alterations in muscle and in blood in patients with chronic widespread pain including fibromyalgia – the first steps”

11.30-12.30 Lunch

12.30-13.30 Dr. Maria Carla Gerra, Department of Health Science and Technology/ CNAP group, Aalborg University, Denmark
“Genetics and epigenetics of fibromyalgia”

13.30-14.00 Dr. Emmanuel Bäckryd
“Biomarkers as a tool for discovery and reverse translation, especially neuropathic pain”

14.00-14.15 Coffee
14.15-14.45 Dr. Niclas Stensson
“Endocannabinoids and related lipids in chronic pain and physical exercise”

14.45-15.00 Concluding remarks
